Elementary Zoology This is a marine form found abundantly along the New England shores fastened to seaweed, submerged wood, etc., just below low tide mark. Note the difference in size of the specimens submitted for.

Examination. Study them with the hand lens. Note the cylindrical sponge body. Do the two ends differ? Note the opening at one end, the osculum.

Press the sponge lightly. Notice the flexibility of the wall. Note the buds on the larger specimens. Do the buds have oscula? Carefully cut a sponge from the osculum to the base. Lay the cut specimen open in water with the cloacal surface up. Does this chamber communicate with that of the buds?
