With only 1% difference, the human and chimpanzee protein-coding genomes are remarkably similar. Understanding the biological features that make us human is part of a fascinating and intensely ...

How can we give animals the best life—for them? What does an animal need to be happy? In her groundbreaking, best-selling book *Animals in Translation*, Temple Grandin drew on her own experience with autism as well as her experience as an animal scientist to deliver extraordinary insights into how animals think, act, and feel. Now she builds on those insights to show us how to give our animals the best and happiest life—on their terms, not ours. Knowing what causes animals physical pain is usually easy, but pinpointing emotional distress is much harder. Drawing on the latest research and her own work, Grandin identifies the core emotional needs of animals and then explains how to fulfill the specific needs of dogs and cats, horses, farm animals, zoo animals, and even wildlife. Whether it's how to make the healthiest environment for the dog you must leave alone most of the day, how to keep pigs from being bored, or how to know if the lion pacing in the zoo is miserable or just exercising, Grandin teaches us to challenge our assumptions about animal contentment and honor our bond with our fellow creatures. *Animals Make Us Human* is the culmination of almost thirty years of research, experimentation, and experience. This is essential reading for anyone who's ever owned, cared for, or simply cared about an animal.

Drawing on the latest research and her own work, Grandin identifies the core emotional needs of animals and explains how to fulfill them for dogs and cats, horses, farm animals, and zoo animals.

Drawing on the latest scientific research and her own work with animals, the author discusses the emotional needs of animals and how to fulfill them, challenging common myths about animal emotions, mental stimulation, and emotional well-being.

Why are dogs so eager to please their owners? Why are some cats bold and others shy? And why do chickens hide their eggs? In this follow-up to her groundbreaking international bestseller, *Animals in Translation*, animal scientist Temple Grandin delivers extraordinary insights into how animals think, helping us give our animals the best and happiest lives - on their terms, not ours. Drawing on her latest research, she identifies the core emotional needs of animals and how to fulfil them. Whether it's creating a happy home for a dog, encouraging cats to be less antisocial, keeping pigs from being bored, or knowing if the lion pacing in the zoo is miserable or just exercising, Grandin teaches us to challenge our assumptions about animal emotions. This is essential and fascinating reading for anyone who owns or cares for an animal.

A response to the devastating 2019-20 bushfires, *Animals Make Us Human* both celebrates Australia's unique wildlife and highlights its vulnerability. Through words and images, writers, photographers and researchers reflect on their connection with animals and nature. They share moments of wonder and revelation from encounters in the natural world: seeing a wild platypus at play, an echidna dawdling across a bush track, or the inexplicable leap of a thresher shark; watching bats take flight at dusk, or birds making a home in the backyard; or following possums, gliders and owls into the dark. Hopeful, uplifting and deeply moving, this collection is also an urgent call to action, a powerful reminder that we only have one world in which to coexist and thrive with our fellow creatures. The words of Australia's favourite writers and renowned researchers are accompanied by images by acclaimed wildlife photographers, highlighting the beauty and fragility of our unique fauna. Featuring: Barbara Allen, Robbie Arnott, Tony Birch, James Bradley, Mark Brandi, Geraldine Brooks, Anne Buist, Melanie Cheng, Claire G. Coleman, Ceridwen Dovey, Chris Flynn, Nayuka Gorrie, Dan Harley, Ashley Hay, Toni Jordan, Leah Kaminsky, Paul Kelly, Meg Keneally, Tom Keneally, Cate Kennedy, David Lindenmayer, Ella Loeffler, Maia Loeffler, Jen Martin, Angela Meyer, Sonia Orchard, Favel Parrett, Marissa Parrott, Bruce Pascoe, Jack Pascoe, Sue Pillans, Nick Porch, Holly Ringland, Euan Ritchie, Antoinette Roe, Kirli Saunders, Graeme Simsion, Tracy Sorensen, Shaun Tan, Lucy Treloar, Karen Viggers, Emma Viskic, John Woinarski, Clare Wright. And photographers: Tim Bawden, Kristian Bell, Rohan Bilney, Justin Bruhn, Andrew Buckle, Matt Clancy, Amy Coetsee, Craig Coverdale, Angus Emmott, Terry Houston, Jayne Jenkins, Vivien Jones, Sue Liu, Michael Livingston, Caleb McElrea, Nick Monaghan, Richard Pillans, Gillian Rayment, Linda Rogan, David Maurice Smith, Colin Southwell, Georgina Steytler, Wayne Suffield, Heather Sutton, Peter Taylor, William Terry, Patrick Tomkins, Belinda Wilson, Matt Wright.

With unique personal insight, experience, and hard science, *Animals in Translations* is the definitive, groundbreaking work on animal behavior and psychology. Temple Grandin's professional training as an animal scientist and her history as a person with autism have given her a perspective like that of no other expert in the field of animal science. Grandin and coauthor Catherine Johnson present their powerful theory that autistic people can often think the way animals think—putting autistic people in the perfect position to translate “animal talk.” Exploring animal pain, fear, aggression, love, friendship, communication, learning, and even animal genius, Grandin is a

faithful guide into their world. *Animals in Translation* reveals that animals are much smarter than anyone ever imagined, and Grandin, standing at the intersection of autism and animals, offers unparalleled observations and extraordinary ideas about both.

A leading anthrozoologist and the bestselling author of *Dog Sense* and *Cat Sense* explains why we are so drawn to pets. Historically, we relied on our pets to herd livestock, guard homes, and catch pests. But most of us don't need animals to do these things anymore. Pets have never been less necessary. And yet, pet ownership has never been more common than it is today: half of American households contain a cat, a dog, or both. Why are pets still around? In *The Animals Among Us*, John Bradshaw, one of the world's leading authorities on the relationship between humans and animals, argues that pet ownership is actually an intrinsic part of human nature. He explains how our empathy with animals evolved into a desire for pets, why we still welcome them into our families, and why we mourn them so deeply when they die. Drawing on the latest research in biology and psychology, as well as fields as diverse as robotics and musicology, *The Animals Among Us* is a surprising and affectionate history of humanity's best friends.

Paul Shepard has been one of the most brilliant and original thinkers in the field of human evolution and ecology for more than forty years. His thought-provoking ideas on the role of animals in human thought, dreams, personal identity, and other psychological and religious contexts have been presented in a series of seminal writings, including *Thinking Animals*, *The Tender Carnivore and the Sacred Game*, and now *The Others*, his most eloquent book to date. *The Others* is a fascinating and wide-ranging examination of how diverse cultures have thought about, reacted to, and interacted with animals. Shepard argues that humans evolved watching other animal species, participating in their world, suffering them as parasites, wearing their feathers and skins, and making tools of their bones and antlers. For millennia, we have communicated their significance by dancing, sculpting, performing, imaging, narrating, and thinking them. The human species cannot be fully itself without these others. Shepard considers animals as others in a world where otherness of all kinds is in danger, and in which otherness is essential to the discovery of the true self. We must understand what to make of our encounters with animals, because as we prosper they vanish, and ultimately our prosperity may amount to nothing without them.

Explores the latest beliefs about why people tell stories and what stories reveal about human nature, offering insights into such related topics as universal themes and what it means to have a storytelling brain.

In a world where we usually measure animals by human standards, prize-winning author and MacArthur Fellow Carl Safina takes us inside their lives and minds, witnessing their profound capacity for perception, thought and emotion, showing why the word "it" is often inappropriate as we discover who they really are. Weaving decades of observations of actual families of free-living creatures with new discoveries about brain functioning, Carl Safina's narrative breaches many commonly held boundaries between humans and other animals. In *Beyond Words*, readers travel the wilds of Africa to visit some of the last great elephant gatherings, then follow wolves of Yellowstone National Park sort out the aftermath of their personal tragedy, then plunge into the astonishingly peaceful society of killer whales living in waters of the Pacific Northwest. We spend quality time, too, with dogs and falcons and ravens; and consider how the human mind originated. In his wise and passionate new book, Safina delivers a graceful examination of how animals truly think and feel, which calls to question what really does—and what should—make us human.
