Aftermarket ECUs are often direct replacements for the car's ECU and will take over all the functions associated with it. They are generally faster and able to cope with a wide variety of additional factors such as water/methanol injection and a turbo timer. Be wary though, as some piggy back ECUs and aftermarket ECUs do not include knock protection.

Engine Control Unit repair. If something has gone wrong with the Control Unit, the problem may be an electrical wiring one. For example, the Engine Control Unit may be telling you that the DPF is blocked, however, the DPF may be brand new and there is a very low chance the DPF, is in fact, blocked. However, the sensor telling the ECU may be giving a bad reading or the wiring may be worn.

Car manufacturers make this map keeping in mind the reliability, emission norms, drivability, and quality of fuel. This often means that these ECU maps are quite conservative and a lot more power can be extracted from the same engine by uploading a new map. This process of uploading a new map on the stock ECU is called remapping or reflashing.
