silos. He tells stories of famous and not-so-famous cold warriors, including some from the US Navy. Some stories are humorous; some stories are tragic. Having traveled extensively in Russia and some former Soviet Union states after retirement, General Adams tells us about his former adversaries, the Soviet cold warriors. In the process, he leaves no doubt about his respect for all who served so valiantly in the "strategic triad"-- the strategic command, the ICBM force, and the submarine Navy.

dividing lines in and between memory cultures across the globe, paying special attention to the impact the crisis-driven age of our present has on images of the past. Authors analysing educational media point to ambivalence, vagueness and contradictions in textbook narratives understood to be echoes of societal and academic controversies. Others focus on teachers and the history classroom, showing how unresolved political issues create tensions in history education. They render visible how teachers struggle to handle these challenges by pretending that what they do is 'just history'. The contributions to this book unveil how teachers, backgrounding the political inherent in all memory practices, often nourish the illusion that the history in which they are engaged is all about addressing

the past with a reflexive and disciplined approach.

The cultural history of the Cold War has been characterized as an explosion of fear and paranoia, based on very little actual intelligence. Both the US and Soviet administrations have since remarked how far off the mark their predictions of the other's strengths and aims were. Yet so much of the cultural output of the period – in television, film, and literature – was concerned with the end of the world. Here, Nicholas Barnett looks at art and design, opinion polls, the Mass Observation movement, popular fiction and newspapers to show how exactly British people felt about the Soviet Union and the Cold War. In uncovering new primary source material, Barnett shows exactly how this seeped in to the art,

SSuggests that John F. Kennedy was assassinated because military leaders feared his dedication to peace would result in the United States falling to Russia

The Soviet Union is often presented as a largely isolated and idiosyncratic state. Soviet Internationalism after Stalin challenges this view by telling the story of Soviet and Latin American intellectuals, students, political figures and artists, and their encounters with the 'other' from the 1950s through the 1980s. In this first multi-archival study of Soviet relations with Latin America, Tobias Rupprecht reveals that, for people in the Second and Third Worlds, the Cold War meant not only

confrontation with an ideological enemy but also increased interconnectedness with distant world regions. He shows that the Soviet Union looked quite different from a southern rather than a Western point of view and also charts the impact of the new internationalism on the Soviet Union itself in terms of popular perceptions of the USSR's place in the world and its political, scientific, intellectual and cultural reintegration into the global community.

This study provides a comprehensive examination of the breaking of political relations between China and the Soviet Union. Based on archival materials from several countries—particularly China—the authors analyze the split from 1959, when visible cracks in the relationship appeared, to China's foreign policy shift toward the United States in 1973.

Much has been written in the West on the history of the Soviet space program but few Westerners have read direct first-hand accounts of the men and women who were behind the many Russian accomplishments in exploring space. The

memoirs of Academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Twenty-seven years later, he became deputy to the founding figure of the Soviet space program, the mysterious “Chief Designer” Sergey Korolev. Chertok’s sixty-year-long career and the many successes and failures of the Soviet space program constitute the core of his memoirs, *Rockets and People*. In these writings, spread over four volumes, Academician Chertok not only describes and remembers, but also elicits and extracts profound insights from an epic story about a society’s quest to explore the cosmos. In Volume 1, Chertok describes his early years as an engineer and ends with the mission to Germany after the end of World War II

when the Soviets captured Nazi missile technology and expertise. Volume 2 takes up the story with the development of the world's first intercontinental ballistic missile (ICBM) and ends with the launch of Sputnik and the early Moon probes. In Volume 3, Chertok recollects the great successes of the Soviet space program in the 1960s including the launch of the world's first space voyager Yuriy Gagarin as well as many events connected with the Cold War. Finally, in Volume 4, Chertok meditates at length on the massive Soviet lunar project designed to beat the Americans to the Moon in the 1960s, ending with his remembrances of the Energiya-Buran project. now presents the definitive account of the global confrontation that dominated the last half of the twentieth century. Drawing on newly opened archives and the reminiscences of the major players, John Lewis Gaddis explains not just what happened but why—from the months in 1945 when the U.S. and the U.S.S.R. went from alliance to antagonism to the barely averted holocaust of the Cuban Missile Crisis to the maneuvers of Nixon and Mao, Reagan and Gorbachev. Brilliant, accessible, almost Shakespearean in its drama, *The Cold War* stands as a triumphant summation of the era that, more than any other, shaped our own. Gaddis is also the author of *On Grand Strategy*.

The Soviet Union was not renowned for its fashionable

clothing. However, after the World War II the Soviet Government opened several parallel organizations of fashion design with fashion houses and ateliers all over the country. The post-war decades witnessed hot debates on destalinization, economic and social reforms and the increasing importance of the public opinion. The cold war and the peaceful competition between the two systems left their marks on clothes fashion. Fashion offers a good insight into Soviet economic planning. Despite increasing opulence, Soviet consumers were not satisfied. Soviet experts on fashion propagated small series of fashionable clothing and the opening of boutiques which never seriously challenged industrial mass production. Using a great variety of unique historical sources the book analyzes the changing economic,
