*Dirt Car Setup Tips - - Circle Track Magazine*

Dirt track race cars can be very difficult to set up. Depending on the condition of the track and your driving style, there can be two very different approaches to your chassis tuning. As long as the tires have near "1 to 1 traction" with the ground, you should set up your race car like an asphalt car (see the Chassis Set-up At The Rear For Cornering

Super Stocks are the next highest stock car class of racing at the local dirt track. Very similar in appearance to street stocks, super stocks allow more modifications to the engine and are capable of producing between 500 and 550 horsepower. Depending on track they can be called super stocks, sportsman, or limited

Dyno Graphs Rear Suspension  
The dirt car rear geometry layouts are varied and usually highly adjustable for both late models and modifieds. Each car needs to be evaluated for where it is to be raced and then set correctly. The trailing arm angles affect the rear steer and bite and the pull bar, or lift arm, can redistribute load upon acceleration and deceleration.

a simple fix is to install a BB in the front  
brake line coming out of the master cylinder.  
Yes, a BB, from a Daisy Red Ryder.

### *The Guide to Cheating in Dirt Track Racing*

Thank you for pointing out the obvious to me  
. I built the car not the engine . As for  
stock arms they worked just fine ,and didn't  
cost anything. I was just trying to help a  
guy asking about what is done to the chassis.  
If he was at the track and saw the car run he  
would know that it worked ( by the way it  
also worked at Eriez ).

*Metric rear tech... - BDLM*

Dirt track racing started in the United States before World War I and became widespread during the 1920s and 1930s using both automobiles and motorcycles. Two different types of race cars dominate – open wheel racers in the Northeast and West and stock cars in the Midwest and South. While open wheel race cars are purpose-built racing vehicles, stock cars (also known as fendered cars) can be either purpose-built race cars or street vehicles that have been modified to varying degrees.

Forty-nine COMP Cams Monster Mini-Stocks took the field at The Dirt Track at Charlotte Friday to set the first nine rows of Saturday's Drydene World Short Track Championship Feature. In the first Heat, Tack Brown [4B] took the lead in Turn 1 on lap one from pole-sitter Spark Parris [43] and led to the finish, fending off several challenges from Parris who would go on to finish second.
