Technological advances in brain imaging, genetics, and computational modeling have set the stage for novel insights into the cognitive neuroscience of human development during childhood and adolescence. As the field has expanded, research in this area increasingly incorporates highly interdisciplinary approaches utilizing sophisticated imaging, behavioral, and genetic methodologies to map brain, cognitive, and affective/social development. The articles in this Research Topic will highlight both the recent advances and future challenges inherent in this burgeoning interdisciplinary field. We invite both review articles and original research reports that consider any of the broad spectrum of topics within the field of developmental cognitive neuroscience.

The LNCS series reports State-of-the-art results in computer science research, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies, LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS, including its subseries LNAI and LNBI, spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. More recently, several color-cover sublines have been added featuring, beyond a collection of papers, various added-value components In parallel to the printed book, each new volume is published electronically in LNCS Online

This book rejects the commonly encountered perception of Friedrich Engels as perpetuator of a 'tragic deception' of Marx, and the equally persistent body of opinion treating him as 'his master's voice'. Engels' claim to recognition is reinforced by an exceptional contribution in the 1840s to the very foundations of the Marxian enterprise, a contribution entailing not only the 'vision' but some of the building blocks in the working out of that vision. Subsequently, he proved himself to be a sophisticated interpreter of the doctrine of historical materialism and an important contributor in his own right. This volume serves as a companion to Samuel Hollander's *The Economics of Karl Marx* (Cambridge University Press, 2008).
