is a free service offering link protection to avoid any links being indexed by spiders and eventually being listed on search engines. Recently, it has been a known fact that some File Hosters have been using private spiders (bots) to track certain file names and delete them immediately without verification, even if the file never contained illegal content, just to avoid any law suits against them.

Keywords density and consistency are notable factors for optimal page SEO. Preferred keywords should have higher keywords density indicating their importance. Optimally, preferred keywords should also be consistently utilized in multiple essential areas of the page such as title, description meta tag, h1 through h6 headings, alt image attributes, backlinks and internal links anchor text.
