experiment, you will use your knowledge of periodic properties and a list of clues to correctly arrange the elements from a scrambled periodic table. You will also predict values for any information missing from the table. Theory: The present organization of the elements is a product of the first periodic table published by Dmitri Mendeleev in 1869.

Answers; The periodic law was developed independently by Dmitri Mendeleev and Lothar Meyer in 1869.

Mendeleev created the first periodic table and was shortly followed by Meyer.

They both arranged the elements by their mass and proposed that certain properties periodically reoccur. Meyer formed his periodic law based on the atomic volume or molar volume, which is the atomic mass divided by the density in solid form.
