Regional cooperation and integration have emerged as key issues for East Asia following the financial crisis. This book explores these issues, and examines the degree to which a new paradigm is emerging. It reviews the evolution of the concepts and practices of regionalism in East Asia, and considers the factors which are shaping new patterns of regional co-operation and integration. It includes discussions of historical developments, economic co-operation, socio-political factors, and defence and security. It considers the role of those states, including China and Japan, which have distinctive approaches to international relations, and assesses the role of regional international bodies such as ASEAN.

In the decade following the Asian financial crisis, the East Asian political economy has experienced a radical transformation. This book thus investigates the responses of Japanese automotive makers to the processes of regionalism and regionalization by locating firm-level analysis in a broader political economy context.

East Asia is one of the world's most dynamic and diverse regions and is also becoming an increasingly coherent region through the interplay of various integrative economic, political and socio-cultural processes. Fully updated and revised throughout, this new edition explores the various ways in which East Asian regionalism continues to deepen. The second edition has been expanded to incorporate coverage of significant issues that have emerged in recent years including: Growing tensions in the region over maritime territory and historical issues Competing regional free trade agreement negotiations The impact of the global financial crisis on financial co-operation and engagement with global governance Obama's 'pivot to Asia' and developments in US relations with East Asia The influence of new technology and social media on micro-level regional relations The growing importance of 'new diplomacy' issues such as energy security, climate change, food security and international migration. Key pedagogical features include: end of chapter 'study questions' case studies that discuss topical issues with study questions also provided useful tables and figures which illustrate key regional trends in East Asia Extensive summary conclusions covering the chapter's main findings from different international political economy perspectives. East Asian Regionalism is an essential text for courses on East Asian regionalism, Asian politics and Asian economics.

Regionalism in Southeast Asia provides the reader with an historical analysis of Southeast Asia from the distinct perspective of regionalism. Southeast Asian history is usually written from a national point of view, which underplays the links between neighbouring states and nations and the effects of these bonds on the

development of regionalism. This innovative book begins by defining the meaning of 'region' and 'regionalism' and then applies it to periods in history in Southeast Asia, looking at how patterns of regionalism have shifted through time to the present day. By focusing on the regional perspective Nicholas Tarling gives an original treatment of Southeast Asian history, its political dynamics and its international realtions. Regionalism in Southeast Asia completes a trilogy of books on Southeast Asia by Nicholas Tarling published by Routledge, the other two are Nationalism in Southeast Asia and Imperialism in Southeast Asia.

This book examines the distinctive evolution of the political and economic relationships of East Asia. It does this by placing East Asian development in the unique historical circumstances that have underpinned its rise to power over the last few decades. This detailed analysis provides the basis for an assessment of a unified East Asian region.

The use of the wind as an energy source is increasing and growing worldwide. Wind energy is an important non-fossil option to supplement fossil (coal, natural gas and oil) and nuclear fuels for the generation of electricity. Many parts of the world, particularly the coastlines of Western Europe, North Africa, North and South America, India, Eastern Russia, China, the Philippines, Australia and New Zealand, experience a high annual incidence of wind energy. The United Kingdom of Great Britain and Northern Ireland, together with the Republic of Ireland form a particularly windy location, being favoured with strong westerly winds. The technology of the design and installation of wind turbines and wind farms are, in fact, well established. Operational practice, though, is still being developed as engineers learn by experience. This book is written for electrical engineers concerned with the use of wind power for generating electricity. It incorporates some meteorological features of international wind supply plus a survey of the past and present wind turbines with technical assessment of the choice of turbine sites. Detailed coverage is given to the different types of electrical generator machines used and the electronic control devices employed in modern turbine systems. Importantly, this book devotes full chapters to the integration of wind farms into established electrical grid supply systems, and the environmental and economic aspects of wind generation. Engineers will be drawn to the practical approach in this book, featuring worked numerical examples – complete with answers – at the end of some chapters.

An exploration of the evolution of regionalism and regional economic relations in East Asia since the late 1990s. The book analyzes moves towards free trade agreements, cooperation in information technology, energy and environment, and agriculture, by highlighting preferences and actions of governmental and business actors.

Get Free Regionalism In East Asia Why Has It Flourished Since 2000 And How Far Will It Go

Developments in East Asia have progressed rapidly in terms of regionalism since the 1997 crisis. The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples, but also challenged the viability of regional organizations, such as ASEAN, to adapt and respond to the changing circumstances. Advancing East Asian Regionalism looks at the ways in which ASEAN has expanded since the crisis, and evaluates the potential of East Asia to come together in a regional formation - one capable of representing the region as a whole - akin to the European Community. It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism. Coupling case study material on regionalism, institutions, and sectoral cooperation, with theoretical debates on regionalization, this book is an invaluable resource that pushes our understanding of East Asian regionalism forward.

An unacknowledged key feature of East Asian FTA diplomacy is the region's active cross-regional preferential trading relations. In sharp contrast to the Americas and Europe, where cross-regional initiatives gained strength after the consolidation of regional trade integration, East Asian governments negotiate trade deals with partners outside of their region at an early stage in their FTA policies. The book asks three main questions: Are there regional factors in East Asia encouraging countries to explore cross-regionalism early on? What are the most important criteria behind the cross-regional partner selection? How do cross-regional FTAs (CRTAs) influence their intra-regional trade initiatives? Through detailed country case studies from China, Japan, South Korea, Singapore, Thailand and Malaysia, we show the ways in which these governments seek to leverage their CRTAs in the pursuit of intra-regional trade integration objectives, a process that yields a much more permeated regionalism.

The Routledge Handbook of Asian Regionalism is a definitive introduction to, and analysis of, the development of regionalism in Asia, including coverage of East Asia, Southeast Asia and South Asia. The contributors engage in a comprehensive exploration of what is arguably the most dynamic and important region in the world. Significantly, this volume addresses the multiple manifestations of regionalism in Asia and is consequently organised thematically under the headings of: conceptualizing the region economic issues political issues strategic issues regional organizations. As such, the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic, giving the reader a chance to evaluate not just where Asian regionalism is going but also how the scholarship on Asian regionalism is analysing these trends and events. This book will be an indispensable resource for students and scholars of Asian politics, international relations and regionalism.
