Named a 2013 Doody's Core Title! "This is an excellent book for both students and current DNP's. The primary areas it addresses—leadership, healthcare policy, and information technology—are essential for the advanced practice nurse to function as a change agent in today's healthcare environment. The book challenges DNP's to engage in clinical practice to the full scope of their capabilities."—Score: 100, 5 Stars. Doody's Medical Reviews This is the only professional issues-oriented Doctor of Nursing Practice (DNP) text to fully integrate all eight American Association of Colleges of Nursing DNP competencies into one volume. It defines practice scholarship for the DNP role and facilitates the sound development of key leadership skills that enable DNP graduates to effectively influence politics and health care policy in order to improve patient and population health care outcomes. The text focuses on the educational requirements of DNP's engaged in the arenas of leadership, health care policy, and information technology. It covers the growth and development of the DNP role, particularly in the context of contemporary health care challenges. With a focus on the Capstone Project, the text addresses the relationship of the DNP role to ongoing scholarship. It covers three important essentials of the DNP curriculum—evidence-based practice, health information technology, and outcomes measurement—and how they can be used to transform health care in the 21st century. The text's challenging and thought-provoking content is of particular value not only to students, but also to professors who will welcome the clarity it offers to the highly complex DNP curriculum. Key Features: Simplifies the highly complex DNP curriculum and integrates DNP core competencies throughout Demonstrates the application of core competencies to practice and aggregate care Provides a well-organized supplement to all courses across the DNP curriculum Uses exemplars of students and practicing DNP's to illustrate effective implementation Offers concrete guidance for achieving a thorough understanding of how DNP graduates utilize core competencies

Highly anticipated and fully updated, Anatomy of Writing for Publication for Nurses, Third Edition, is a practical and useful guide for nurses who need to bridge the gap from incomplete sentences to a published manuscript. Lead Author and Editor Cynthia Saver removes the fear and confusion most nurses have about the writing and publishing process. Along the way, 25 of nursing's top writing experts and decision makers share important insights to help you increase the likelihood that your manuscript gets accepted for publication.

Awarded first place in the 2013 AJN Book of the Year Awards in the Advanced Practice Nursing category Named a Doody's Core Title "This is an excellent and timely tool for advanced practice nurses." Score: 100, 5 stars --Doody's Medical Reviews Measuring the results of APN care has become increasingly important as a way to demonstrate the significant impact of APN nurses on practice outcomes. The third edition of this award-winning volume has been updated to provide the most current knowledge, perspectives, and research on assessing outcomes of APN care. It addresses not only the health outcomes of APN practice but the economic impact of APN care as well. Chapters discuss outcome measurement in all areas of advanced practice nursing, including identifying outcomes in specialty areas and in community and ambulatory settings. The text provides detailed descriptions of how to conduct outcomes assessments, how to locate the most current instruments and measures for APN assessment, and perspectives on international initiatives in APN assessment. Examples of outcomes studies at the DNP level are culled from the most current published projects. Written by expert practitioners, educators, and researchers in APN outcomes assessment, this book will provide the essential information to help all APNs—regardless of specialty area or practice setting—to increase their skill level in designing outcomes-focused clinical research, selecting instruments, and analyzing outcomes data as critical components of their professional practice role. The third edition is completely updated and expanded to include: A new chapter on assessing outcomes at the DNP level through data gained from the most current research An expanded literature review on outcomes measurement research Guidelines for selecting assessment instruments Perspectives on an international initiative for the development of an APN research data collection toolkit New chapter objectives and critical discussion questions Updated web links

The purpose of this study was twofold: to determine whether Master of Science in Nursing (MSN) students find the AHP process helpful when choosing the topic for their three credit capstone project; and to test the utility of an open source software package for conducting AHP (the Business Performance Management Singapore AHP Online System). Four students participated in the AHP process. All four students found the process helpful when choosing a project topic. One of the participants qualified this by stating only if the student was unsure about the choice of topic. The BPSMG was easy to use and resulted in individual and group decision making hierarchies. All four students thought that the AHP process would be useful for other students because it helps to recognize personal interests and priorities and to organize ideas. "Relevance to my current job" was found to be the top priority when deciding on project topic, followed by "relevance to my future career". In descending order of importance other influences on selection of project topic are: "Interest in the study population"; and "Help me to get a better job". Neither the workload involved in completing the study nor the ease of writing up the results was a major influence on choice of project topic. Overall the findings of the study suggest that the AHP process may assist MSN students to prioritize potential topics when deciding on a focus for their capstone projects and that the BPSMG AHP Online System is suitable software for the analysis of AHP decision making processes; although some students will require assistance to use the software. It should be noted that the study was limited by the small sample size.

Clinical Research for the Doctor of Nursing Practice is a user-friendly guide that offers DNP students a step-by-step method to implement clinically-based research. Designed specifically for DNP-level research courses, this text introduces a streamlined approach that emphasizes crucial information while eliminating extraneous material. Each chapter addresses specific areas that pertain to the DNP student, such as designing and implementing the Capstone Project, and includes features such as learning enhancement tools, resources for further study, learning objectives, and a glossary. Key chapters on Mixed Methods Research and Survey Research are also included making this text an essential resource for the DNP student.

Designated a Doody's Core Title! "Writing for publication is essential for disseminating nursing knowledge, and this book will surely prepare budding authors and serve as a resource for experienced authors. It is a great reference for authors at all levels." Score: 100, Five Stars --Doody's Medical Reviews This in-depth resource on writing for nurses—clinicians, graduate students, researchers, and faculty—guides users through the entire process of writing evidence-based research papers and journal articles, disseminating clinical project findings and innovations, and preparing manuscripts for publication. The completely updated fourth edition expands the content on conducting and writing systematic, integrative, and literature reviews; disseminating evidence and writing papers on clinical topics; and reporting quality-improvement studies. It provides new examples of excellent writing from a varied selection of nursing journals. Woven throughout is an explanation of current writing guidelines for research such as CONSORT and PRISMA. Also included are electronic versions of useful forms and updated web resources relevant to each chapter. Chapters feature helpful tables, figures, and illustrations; learner exercises to guide development of competencies; and discussion topics designed to address the variety of challenges posed when writing for publication. The print version of the book includes searchable digital access to entire contents. New to the Fourth Edition: Updated chapters and new examples from a wide variety of nursing journals Expanded content on conducting and writing systematic, integrative, and literature reviews Guidelines for reporting different types of research Criteria for evaluating the quality of a nursing journal and avoiding predatory journals Examination of open-access journal markets Strategies for interprofessional collaboration Updated content on quality-improvement reporting Tips to avoid plagiarism Guidance on writing case studies, case reports, policy papers, and articles Expanded discussion and examples of searchable databases Electronic versions of useful forms Updated web resources in each chapter and in an appendix Key Features: Takes the reader step by step through the entire process of writing for publication Covers conducting and writing a literature review and writing research, review, quality-improvement, evidencebased practice, and clinical practice articles Delivers strategies for writing all types of journal articles, chapters, books, and other forms of writing Includes tips for turning dissertations, DNP projects, and course assignments into manuscripts Details the submission, editorial review, and publication processes Includes a module for online courses in each chapter Includes Instructor's Manual, PowerPoints, and sample syllabus
