New Shop Floor Control ...~~

Shop floor management is developing and managing the shop floor operations, inventory, equipment and workers. The following diagram displays the general phases of a manufacturing/processing/assembly business. A shop floor being the participant of a production phase, its management requires dealing and handling all those factors which are directly involved

As per Mr. Kiyoshi Suzuki
(author of The New Shop
Floor Management), shop
floor management is
practicing the three reals:
Genba (Real Place): It
refers to the location where
the value is created. It can
be either the factory floor
or a business process.
Genbutsu (Real Thing): The
realistic information of all
the problems rather than the

Shop floor management is
concerned with preplanning,
planning, staffing,
directing, monitoring and
control of activities that
enhance shop efficiency and
analysis.

Production/operations
activity signifies the
process of transformation of
materials (inputs) into
desired output
