More than 75 years ago, Gordon Allport stated that the attitude construct is the heart of social psychology. Allport's sentiment remains true today - people's evaluations of themselves, other individuals, groups and social issues are the core of the discipline. This four-volume set brings together important papers on the psychology of attitudes to serve as the most fully comprehensive collection on the attitude concept.

Attitudes Definition. Attitudes refer to our overall evaluations of people, groups, and objects in our social world. Reporting an attitude involves making a decision concerning liking versus disliking or favoring versus disfavoring an attitude object. Attitudes are important because they affect both the way we perceive the world and how we behave. Indeed, over 70 years ago, Gordon Allport asserted that the attitude concept is the most indispensable concept in social psychology.
