Consumer Product Innovation and Sustainable Design follows the innovation and evolution of consumer products from vacuum cleaners to mobile phones from their original inventions to the present day. It discusses how environmental concerns and legislation have influenced their design and the profound effects these products have had on society and culture. This book also uses the lessons from the successes and failures of examples of these consumer products to draw out practical guidelines for designers, engineers, marketers and managers on how to become more effective at product development, innovation and designing for environmental sustainability.

Strategic Marketing Planning concentrates on the critical planning aspects that are of vital importance to practitioners and students alike. It has a clear structure that offers a digest of the five principal dimensions of the strategic marketing planning process. Leading authors in this sector, Gilligan and Wilson offer current thinking in marketing and consider the changes it has undergone over the past few years. Updated information in this new edition includes: * Changing corporate perspectives on the role of strategic marketing activity * Changing social structures and the rise of social tribes * The significance of the new consumer and how the new consumer needs to be managed * New thinking on market segmentation * Changing routes to market * Developments in e-marketing * Changing environmental structures and pressures

Creating and maintaining health becomes more complicated and expensive by the heartbeat. "Take Back Your Body"] offers manageable, 500-word tips that are quick to read and simple to implement-plus many ways to save time and money. From a four-minute recipe for the Ultimate Smoothie to a five-minute workout, readers of "Take Back Your Body" shift from Health Care to Self Care with simple changes. Plus-they get healthier while saving hundreds of dollars a month at both the market and the pharmacy. Using humor and real-life stories of anonymous clients, "Take Back Your Body" offers practical ways for readers to save money and improve their health simultaneously. In a concise, entertaining, can-do format, chapters include: Food as Medicine-With A Sensual and Savory Experience on Top Exercise for the Rest of Us How Sex and Meditation Get You to the Same Place-and other Lifestyle Tips My Favorite Herbs for Healing and Prevention Special Issues for Women Special Issues for Men Time Savers (since no one has time to eat whole foods and exercise)

Debbie Taylor--novelist, traveller and author--takes us on a journey to meet seven remarkable women. In each of seven countries, she lives with one woman, learning about her work and her family, her fears and beliefs, her loves and losses. Taylor portrays them vividly: Jomuna, forced into backbreaking work hawking dried fish door-to-door, looked down upon and ostracized because she is a widow; Hua, a factory worker whose husband divorced her for giving birth to a daughter; Lydia, who followed her mother into prostitution after her husband ran off with another woman. Varied though their stories are, these women's lives are made similar by dual enemies: poverty, which pulls them down to the lowest rungs in their societies, and patriarchy, which sabotages their attempts to climb higher. These forces bring about

what Taylor calls the Fourth World: families headed by women, now comprising one-quarter of all households in the world. Taylor tells these moving stories with great empathy and insight. Ranging from China, India, and Australia to Uganda, Egypt, Brazil, and Scotland, she brings to life the worlds these women inhabit, meticulously detailing their struggles to secure a decent life for themselves and their children. The New Global Marketing: Local Adaptation for Sustainability and Profit discusses the ways that marketing managers can assess the potential for global expansion and help their firms capitalize on opportunities. The book explores which companies and products should expand internationally, what countries offer the best opportunities, and which marketing plan will lead each product or company to success. The material adapts well-established frameworks to demonstrate how the global marketer can assess company strengths and weaknesses and analyze opportunities and risks in foreign markets. It discusses the proper balance between standardization and localization, and addresses the importance of the "triple" bottom line - environmental sustainability, social fairness, and financial performance. Students also learn about bottom-of-the-pyramid markets, the role of digital global marketing, and the importance of adapting to international political, social, and environmental pressures. Featuring more than twenty original case studies, The New Global Marketing is an excellent introduction to what it really takes to succeed as a global marketer. Written for students with some marketing education and exposure to international business, the book is ideally suited to upper-level business courses and M.B.A. programs.

A compact overview of the most relevant concepts and developments in International Management. The various strategy concepts of internationally active companies and their implementation in practice are the core of this book. The authors describe the particularities of international value chain activities and management functions and offer a thorough understanding of how Production & Sourcing, Research & Development, Marketing, Human Resource Management and Controlling have to be designed in an international company and what models are available to understand those activities in an international context. In 23 lessons, a comprehensive overview of all key issues is given. Each lesson is accompanied by a case study from an international company to facilitate the understanding of all important factors involved in strategic international management. In this third edition, all chapters have been updated, all case studies revised, new chapters and recent data were integrated.

This book tells 101 stories of company efforts to implement the many aspects of flow manufacturing -- including such topics as just-in-time production, total quality control, reorganization of factories into product-focused or customer-focused cells, plants-in-a-plant, material flows by the simplicity of visual kanban, supplier partnerships, quick setup of equipment, cross-training and job rotation of the work force, and many more. The 101 mini-case studies -- dubbed "caselets" -- include 26 non-U.S. companies from 12 countries and cover a wide swath of industrial sectors, and include many well-known corporations such as Apple, Campbell Soup, Honeywell, and Boeing. From the 1980s to the present, the author has been taking the message of process improvement and customer-focused excellence far and wide. Most of these travels, usually in connection with delivering a seminar, include brief factory tours in which he compiled detailed notes and then organized them as brief reports -- his unvarnished analysis or take on what they do well and what needs improvement. In the main the reports were then sent back to the hosts of the plant tour. These factory tours and these follow-up reports form the basis of the large majority of this book's caselets. Many of the caselets bring to life process-improvement methodologies in detail. With lots of caselets to draw from, the readers will find vivid examples of similar companies and processes within their respective industries. For example, the caselets often include applications of advanced concepts in cost management, employee training, performance management, supply chains, and logistics as well as applications of plant layout, quick setup, material handling, quality assurance, scheduling, ergonomics, and flow analysis.

Of all the works of the man claimed by many as the father of modern philosophy, the MEDITATIONS, first published in 1641, must surely be Rene Descartes' masterpiece. This volume consists of not only a new translation of the original Latin text and the expanded objections and replies, but also includes selected correspondence and other metaphysical writings from the period 1641-49.

The promise of the European pursuit of ever closer union created tremendous optimism that conflict was the past and harmony would be the future. The enthusiasm for economic integration and monetary union, through the Euro, enhanced the confidence that differences among countries could be overcome. In this dynamic and incisive overview of the European project from its beginnings, Ashoka Mody convincingly demonstrates that the tensions and flaws of the European project were both baked-in and foreseen from the beginning. He focuses on personalities whose ambitious and relentless push for integration led them to choose facts and analysis consistent with their visions and to dismiss warnings of turbulence. They thus laid the seeds for disappointment. Mody examines key moments when contradictions were papered-over, compromising the integrity of integration. He shows how political and economic leaders believed the stories they told themselves about the inevitability of a united Europe as a foundation of peace, prosperity, and democratic ideals, even in the face of warnings from the earliest stages that while the political pillars seemed strong, the economic foundations were weak. Mody compellingly shows how monetary union impaired European integration rather than enhanced it. European countries have always had vastly different economic conditions, and the common currency increased divergences rather than smoothing them, as many analysts warned at the time. The economic, financial, and political pathologies of the euro were there from the beginning, even if the global economic boom hid them. With political and economic elites benefitting, they could ignore the growing discontent of those who suffered and the antipathy to the European project in national heartlands. When crisis inevitably hit, leaders denied, delayed, and took half-measures that only further alienated people. If once the inability to deliver on the economic promise caused the political handicaps to worsen, now the political splintering is making it harder to mount an effective response.

Analysis of the South African household electrical durables industry which includes appliances such as stoves, refrigerators, hi-fi sets etc.
